

## WHAT IS CLAIMED IS:

- 1 1. A focus control apparatus which controls a focus of an objective  
2 lens for focusing light against an optical disk having a plurality of signal  
3 recorded layers, comprising:
- 4 focus drive means for moving the objective lens in a direction  
5 orthogonal to the recorded layers of the optical disk;
- 6 photodetection means for detecting reflected light from said  
7 optical disk;
- 8 focus-error-signal generation means for generating a focus error  
9 signal which corresponds to defocusing of said objective lens relative to  
10 any of said recorded layers of said optical disk, on the basis of a detection  
11 signal of said photodetection means;
- 12 recorded-layer movement control means for generating a signal  
13 which controls said focus drive means, on the basis of the error signal, in  
14 order to move said objective lens on the recorded layer which is an  
15 objective of said objective lens; and
- 16 focus pull-in means for pulling in the focus of said objective lens  
17 onto said recorded layer on which said objective lens is to be focused, said  
18 pull-in means being permitted to switch ON/OFF by said recorded-layer  
19 movement control means;
- 20 wherein said recorded-layer movement control means calculates  
21 an intermediate value from a maximum value and a minimum value of

22 said focus error signal corresponding to the certain recorded layer; and  
 23 in case of moving the focused position of said objective lens to said  
 24 recorded layer, said focus pull-in means is turned ON when said focus  
 25 error signal has corresponded to the intermediate value.

1 2. An optical disk playback system comprising the focus control  
 2 apparatus as defined in Claim 1.

1 3. An optical disk playback system as defined in Claim 2, wherein a  
 2 process in which said recorded-layer movement control means calculates  
 3 said intermediate value from the maximum value and the minimum value  
 4 of said focus error signal corresponding to said certain recorded layer is  
 5 executed in advance of playback of said optical disk.

1 4. A focus control apparatus wherein a layer jump of an objective  
 2 lens is controlled for an optical disk having a plurality of signal recorded  
 3 layers, comprising:

4 means for obtaining an intermediate value from a maximum value  
 5 and a minimum value of a focus error signal which corresponds to  
 6 defocusing of the objective lens, and which is generated by a certain one  
 7 of the recorded layers; and

8 means for turning ON a focus servo which pulls in a focus of said  
 9 objective lens, with a bias at which the focus error signal corresponds to  
 10 the intermediate value, in case of the layer jump to the recorded layer.

1 5. A method of controlling a layer jump of an objective lens for an  
2 optical disk having a plurality of signal recorded layers, comprising the  
3 following steps of:

4 obtaining an intermediate value from a maximum value and a  
5 minimum value of a focus error signal which corresponds to defocusing of  
6 the objective lens, and which is generated by a certain one of the recorded  
7 layers; and

8 turning ON a focus servo which pulls in a focus of said objective  
9 lens, with a bias at which the focus error signal corresponds to the  
10 intermediate value, in case of the layer jump to the recorded layer.

1 6. A program for controlling a layer jump of an objective lens,  
2 executable by an apparatus which plays back an optical disk having a  
3 plurality of signal recorded layers, causing said playback apparatus to:

4 obtain an intermediate value from a maximum value and a  
5 minimum value of a focus error signal which corresponds to defocusing of  
6 the objective lens, and which is generated by a certain one of the recorded  
7 layers; and

8 turn on a focus servo which pulls in a focus of said objective lens,  
9 with a bias at which the focus error signal corresponds to the intermediate  
10 value, in case of the layer jump to the recorded layer.

1 7. A storage medium recorded with the program product as defined  
2 in Claim 6.
